**Create two Lambda Functions**

- **First Lambda function returns 200 Response as {"Hello": "Default"}**
- **Second Lambda function returns 200 Response as {"Hello": "{Dynamic route name}"}**
- **Configure API Gateway with that hits first lambda function on / and the second lambda function on /***

goto lambda > create function > goto code >> write below code of screenshot on both lambda

create api gateway

In resource give a path / and other resource give /{proxy+} while Intergation

Stage: - ▼   **Deploy**

sarojapigateway

Edit

API details
